

## ✖ Try again once you are ready.

Required to pass: 80% or higher

You can retake this quiz up to 3 times every 8 hours.

[Back to Week 2](#)[Retake](#)

0 / 1  
points

1. This quiz encompasses data and content from Week 1 and 2, so we recommend reviewing that material from last week for this quiz as well. What is the highest level that the team has reached in gameclicks? (Hint: use the MAX operation in postgres).

☐ 7

☒ 6

**This should not be selected**

☐ 8

☐ 9

☐ 10

1 / 1  
points

2. How many user id's (repeats allowed) have reached the highest level as found in the previous question? (Hint: For postgres: you may either use two queries or use a sub-query).

Postgres, MongoDB, and Pandas

Quiz, 5 questions

☐ 106436

☒ 51294

**3/5 points (60%)**

Correct

- ☐ 98823
- ☐ 67271
- ☐ 122757

0 / 1  
points

3. How many user id's (repeats allowed) reached the highest level in game-clicks and also clicked the highest costing price in buy-clicks? Hint: Refer to question 4 for ideas.

☒ 23301

This should not be selected

- ☐ 73226
- ☐ 32747
- ☐ 66887

1 / 1  
points

4. What does the following line of code do in postgres?

```
SELECT count(userid) FROM (SELECT  
buyclicks.userid, teamLevel, price FROM  
buyclicks JOIN gameclicks on buyclicks.userid =  
gameclicks.userid) temp WHERE price=3 and  
teamLevel=5;
```

- ☒ Finds the total number of user ids (repeats allowed) in buy-clicks that have bought items with prices worth

\$3 and was in a team with level 5 at some point in time.

Correct

- ☐ Counts the users who exists between both gameclicks and buyclicks files.
- ☐ This is an invalid line of code, the subquery is not formatted properly.
- ☐ Displays the users who have bought items worth \$3 and have had a team with level 5.

5. In the MongoDB data set, what is the username of the twitter account who has a tweet\_followers\_count of exactly 8973882?

1 / 1  
points

- ☐ Autocenterit
- ☒ FIFAcorn

Correct

- ☐ SasSpear
- ☐ CreateImga
