3. At 2:45 of the video, the Instructor creates a filter for all of the counties in California with a population greater than 1,000,000. However, included in the results is the entire state of California. This anomalous value might skew our analysis if, for example, we wanted to compute the average population of these results. What additional filter might work to resolve this problem?

- ☐ Add a filter to detect and remove results which do not include the word "County" in column G.
- ☐ Add a filter which finds all counties with population greater than 100,000 AND less than 10,000,000 for column H (CENSUS2010POP).
- ☒ Add a filter where the value in column E is greater than 1,000,000.
